- **Weakness:** Overthinking, Impatience with Slow Progress, Struggling to Saying No
- **Languages:** English, Hindi, Marathi

EDUCATION

Bachelor of Computer Engineering

Sir Visvesvaraya Institute of Technology,
Nashik

📅 2024

📍 Nashik, Maharashtra

- CGPA: 7.49

Class XII (HSC)

Mahatma Gandhi Jr College

📅 2020

📍 Karjat, A.Nagar, Maharashtra

- Percentage: 58.47

Class X (SSC)

New English School, Takali [Kh]

📅 2018

📍 Karjat, A.Nagar, Maharashtra

- Percentage: 86.60

PROJECTS

Sentiment Analysis on Social Media

- Developed a social media sentiment analysis app using Python, Django, and machine learning. The app analyzes public opinion on user-defined topics by processing text and classifying sentiment (positive, negative, neutral) using trained models. Integrated MySQL for data storage and web technologies for interactive visualization, exploring public perception and empowering informed decision-making.

Personal Portfolio Website

- Designed and developed a personal portfolio website to showcase my skills, projects, and accomplishments, effectively highlighting my professional journey and expertise.

Gender and Age Detection Using Artificial Intelligence

- Successfully implemented an AI-based system for gender and age detection, leveraging computer vision and machine learning techniques to provide accurate demographic insights from images and videos.

Restaurant Website Design Using Front-End Technologies

- Designed a visually appealing and user-friendly restaurant website using front-end technologies, ensuring seamless navigation and enhancing the overall customer experience. Implemented responsive design principles for optimal performance across various devices.
